第 11. 至 15. 題為題組

For decades a mature human brain was believed to be incapable of growing new neurons. Evidence was building that the adult brain could, _____ 11. _____, create new neurons. In one experiment with mice, scientists found that simply running on a wheel led to the birth of new neurons in the hippocampus, a brain structure _____ 12. _____ memory. Since then, other studies have established that exercise also has positive effects on the brains of humans and that it may even help _____ 13. _____ the risk of Alzheimer's disease. Why does exercise affect the brain at all?

The answer lies in the fact that exercise is actually _____ 14. _____ a cognitive activity _____ 14. _____ a physical one. Exercise acts directly on the body and triggers physiological responses such as the release of certain chemicals, which in turn boost the growth of new brain cells. A study of more than 7,000 adults in the U.K. in 2019 (showed) that people who spent more time in intense physical activities _____ 15. _____ large hippocampal volumes. That's why you should try to exercise every day, even if it's only just a brief walk. You should get your body moving to keep your brain healthy.

第 16. 至 20. 題為題組

Bitcoin is a digital currency, or cryptocurrency, introduced in 2008. Different from traditional currencies, Bitcoin is _____ 16. _____ controlled by any authorities _____ 16. _____ operates across the global network based on a technology known as blockchain. Since there are numerous encrypted transactions, or "blocks," _____ 17. _____ together, the chain is not easily interfered with by individuals, which ensures the security of transactions.

One significant advantage of Bitcoin is decentralization. Since no organization and government can control people's Bitcoin, those worrying about how their money is used by banks are free from such concerns _____ 18. _____, the supply of Bitcoin is limited, and no individual can issue it at will. This feature prevents the value of Bitcoin from being eroded by the creation of more money in circulation. Despite these, there are some shortcomings in Bitcoin and other digital currencies as well. For example, using Bitcoin for transactions requires _____ 19. _____ expertise, which may pose problems for those unfamiliar with the technology.

Currently, the Bitcoin blockchain has not become as widespread as conventional centralized payment networks like Visa or Mastercard; nonetheless, when the technological, economic, and regulatory issues are _____ 20. _____, it is theoretically possible that cryptocurrencies will become more popular than traditional currencies many years later. We can wait and see what bitcoin may accomplish in the next decade.

心得反思

我在這次自主學習的過程中，有預期進度達不到的狀況。我在文法整理時，我只來得及完成第一冊的文法，第二冊需要帶回家做，所以讓我不知道在安排任何進度時，需要考量到自己的能力範圍。我知道學好英文靠這些是不夠的，所以需要其他面向來增強英文能力。例如：檢定、外國電影、外國歌曲。整體學習過程很充實，其中我進步最大的點，就是寫翻譯題和作文。從以前因為怕出錯，所以只會用一些簡單的單字和最基本的文法。到現在敢嘗試用高中的單字和文法去寫。

只要你肯開始，
就永遠不會晚。
